

BEFORE YOUR TREE INSTALL

You will need to contact Digger's Hotline

-THIS IS FREE-

You will need to mark out the area where the tree is to be planted.
(You can use a flag, marking paint, bucket, rock etc.)

Call Digger's Hotline by dialing 811

Please ask them to mark a **10 foot** radius around the object that is placed where the tree is to be planted. We do not need the entire yard marked out only where they will be digging.

You must then call or email us with the 11 digit ticket number that they provide you.

We will need to call Digger's Hotline to make a copy ticket with this number.

Your install can then be scheduled for a minimum of 4 business days after OUR copy ticket has been made with Digger's Hotline to ensure that the area has been marked before our guys begin any digging.
